SECTION H PHOTOGRAPHY EXHIBITS

Mount individual photos on poster board, card stock, mount board or mat board; **not to exceed 6" x 8"** except where noted. Do not use foam board or construction paper.

Each photo **must** include the following on the **back** of every exhibit: camera type, brand, model and film size if film is used except where otherwise noted. Also, please note anything unusual about your picture (e.g. mounting, focus, subject etc.) that you think will help the judges to better understand your picture. For example, if you enter a picture of yourself or a picture with you in it, explain how you did that.

Judges will be asked to assess the entire exhibit. This includes not only the photograph, but also the mounting and any titles that are attached. Sloppy writing, glue on the mat, a poorly cut mat or crooked mounting all can detract from the photograph and lower the overall score.

Photographs in classes 126-146 may be taken using a digital camera, color film or black and white film. Only one entry per class is permitted and each photograph may be entered only once in this entire section, including photos entered in the portfolio classes. The exception to this rule is in classes 148-150, where only 50% or more of the images must have been taken during the past year. Photos entered in the digital slide show may also have been entered in other classes. Also photos entered in class 145 (Best Photo Album) may have been entered as individual photos.

All photographs must have been taken by the 4-H member since the beginning of the previous year's State Fair. Note that the name of each class indicates what the **primary** focus of that class should be. For instance, if you enter a picture of you with your lamb, it should be entered in whatever the primary focus of that picture is.

TIPS: Visit <http://www.4-hmall.org/Calendar/PhotoContest2011.asp> for examples of outstanding 4-H photographs. This site contains all the photographs in the National 4-H Calendars from 2002-2011. Your 4-H Photography Project Manuals (Units 1-3) have all the information you need to learn how to take great pictures. Also check Fast Facts at <http://www.4-HPhotography.org>. Remember the rule of thirds when taking pictures. This places the focal point off center.
